 miles  
**Watershed  
 Management**

## Power Generation and Transmission

- In Georgia, TVA operates two hydroelectric dams with a combined generating capacity of 30 megawatts. The dams are Blue Ridge in Fannin County and Nottely in Union County.

- TVA has contracted for 9.9 megawatts of renewable biomass, solar and wind capacity in Georgia.

**22** substations &  
 switchyards &  
miles of transmission line **469**

## Land and Water Stewardship

- Blue Ridge and Nottely reservoirs, as well as a portion of Chatuge Reservoir, are located among the scenic mountains of Georgia and have a combined surface area of more than 11,000 acres and about 250 miles of shoreline.

- TVA manages recreational, natural and cultural resources on more than 1,700 acres of public land around these reservoirs and partners with communities and local, state and regional stakeholders to improve water quality and aquatic biodiversity, shoreline conditions, recreation, wildlife and habitats on lands, reservoirs and their tributaries.

**250** miles of shoreline  
  
**1,700**  
 acres of public land

## River Management

- TVA maintains the structural, seismic and hydraulic integrity of two multipurpose dams in Georgia: Blue Ridge and Nottely.
- TVA operates the dams and reservoirs in Georgia as part of an integrated multi-purpose reservoir system to provide numerous stakeholders a variety of benefits that include navigation, flood risk reductions, low-cost hydropower, water supply, water quality and recreational opportunities.
- Nine municipalities and two industries in Georgia draw water from the Tennessee River system. Water also is drawn for irrigation.
